

## EC 0.6 - Reports

Rochana R. Obadage

Due Date: Jan 25, 2025

### Q1

*You may copy the question into your report, but make sure that you make it clear where the question ends and your answer begins.*

### Answer

*All figures must have a caption and must be referenced in the text. Example below.*

Figure 1 shows a captured image of the landscape in the Bavarian Forest. The image was taken by a photographer named Pascal Bullan.

**Figure 1:** A landscape capture of the Bavarian Forest by Pascal Bullan

*If you want to include code in your report, you can insert a screenshot (if it's legible), or you can copy/paste the code into a listings environment. There are examples below and more information is available at [https://www.overleaf.com/learn/latex/code\\_listing](https://www.overleaf.com/learn/latex/code_listing).*

Listing 1 is an example of directly copying code into the LaTeX document and having the listings package perform syntax highlighting. Listing 2 is an example of importing the code from a file rather than copying it in.

```
1 #!/usr/local/bin/python3
2
3 thisdict = {
4     "brand": "Ford",
5     "model": "Mustang",
6     "year": 1964
7 }
8 for x, y in thisdict.items():
9     print(x, y)
```

**Listing 1:** Python dictionary example to Loop through both keys and values, by using the items() function

```
1 #!/usr/local/bin/python3
2 # testargs.py
3
4 import sys
5
6 print("{} is the name of the script." . format(sys.argv[0]))
7 print("There are {} arguments: {}".format(len(sys.argv), str(sys.
8     argv)))
9
10 for ind, arg in enumerate(sys.argv):
11     print("{}: {}".format(ind, arg, sys.argv[ind]))
```

**Listing 2:** Python sample code loaded from file

Table 1 shows a simple example table. Table 2 shows an example confusion matrix (you'll see this term later) from [https://en.wikipedia.org/wiki/Confusion\\_matrix](https://en.wikipedia.org/wiki/Confusion_matrix). This employs rows that span multiple columns (multicol) and columns that span multiple rows (multirow).

**Table 1:** Simple Table

Week	Date	Topic
1	Jan 11	Introduction to Web Science and Web Architecture
2	Jan 18	Introduction to Python
3	Jan 25	Measuring the Web
4	Feb 1	Searching the Web

*You must provide some discussion of every answer. Discuss how you arrived at the answer and the tools you used. Discuss the implications of your answer.*

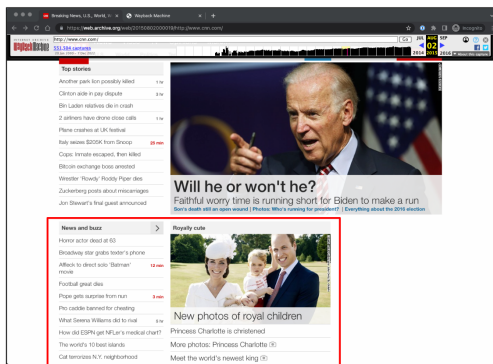

**Table 2:** Example Confusion Matrix from Wikipedia

		Actual	
		Cat	Dog
Predicted	Cat	5 (TP)	3 (FP)
	Dog	2 (FN)	3 (TN)

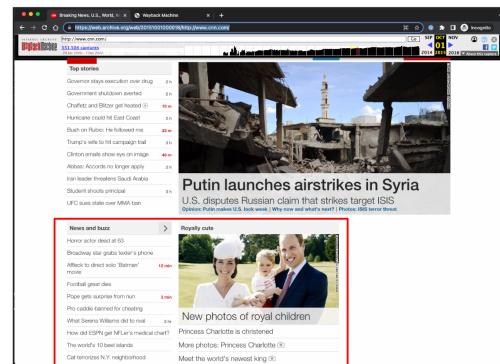

**Q2**

**Answer**

Figure 2 shows an example of grouping related figures into a subfigure. This includes Figure 2a and Figure 2b.

(a) Archived CNN.com from Aug 2, 2015,
